MacYTDL Release Notes – Version 1.26.1

- Fixed the crash when "Check yt-dlp version on startup" is turned on.

- Added some Spanish translations that were missing and improved others – many thanks to Michel.

- Default settings should be translated correctly when switching between English and other languages then back again.

- The "Utilities" dialog should no longer trim longer text labels in non-English languages.

- Simplified wording of the update YT-DLP facility in "Utilities".
